Feature List

- User Friendly Operation** - LED, touch-panel Keypad with easy to read icons assisting operators utilizing all balancing functions.
- Large Rim Diameter Balancing** - able to balance up to 24" Rim diameter & 39" overall Wheel Diameter.
- Multi-Mode Vehicle Balancing** - standard with Car & Motorcycle balancing modes.
- Ease-Of-Use** - with manual measurement input for distance & diameter with Static / Dynamic & 3 ALU modes.
- Self-Calibrating & Self Diagnosis** - for improved efficiency & serviceability.
- Integrated Measurement Indicator** - allows for ease of acquiring measurement data with a retractable, stylish measuring tool, integrated into the machine.
- Multi-User Operation** - allows two operators to work simultaneously with different settings.
- Integrated Centering Spring** - to assist with quick and proper wheel mounting on balancing shaft.
- Electronic Braking System** - conveniently slows wheel down after balancing cycle.
- Heavy Duty Balancing Shaft** - 36mm diameter balancing shaft accommodates wide range of wheels of different sizes and shapes.
- Speed-Nut Mounting** - the Speed-Nut allows for quick & efficient wheel mounting, easily securing the wheel to the spindle with convenient lead-in screw.
- Multi Pocket Wheel Weight Shelf** - 23 articulated pockets, over 1.5" deep, allowing plenty of storage weights, tooling & cones.
- Large Wheel Hood** - the large 38" hood / shroud prevents debris from flying off the tire while in use.
- Storage Pegs** - for convenient storing of balancer cones & caliper on side of housing.
