RAJ-8K-H & RAJ-8K-L 8,000 lbs. Rolling Air Jacks w/ Universal Roller Body Assemblies New Product Information 1-8-15

➤ Product Description:

- The RAJ-8K Rolling Air Jack is a high quality, low profile, Air Bag, scissor type rolling bridge Jack with Pneumatic operation that includes exclusive telescoping Universal Roller Body Bracket Assemblies designed for either High Mount or Low Mount applications. The RAJ-8K adjustable 'spring loaded' Roller Body Assemblies also consist of dual precision 'on-rail' type Roller Bearing Wheels and Side Bearing Guide Wheels designed for smooth and safe operation. The RAJ-8K Jacks also come standard with stackable Pad & Height Adaptors, dual Air Bags, adjustable Pressure Regulator & Locking Height Position.

RAJ-8K-H
'High Mount'

RAJ-8K-L
'Low Mount'
w/ Pad & Adaptors

Dual Air Bags

'Exclusive' Universal type Roller Body Brackets:

- RAJ-8K-H – 'High Mount'** model incorporates adjustable height Roller Body Brackets suitable for Four Post Lifts using low profile Jacks with low mount jack rails and high profile Runways, to provide enough clearances for proper operation and from touching the ground when fully lowered. Two adjustable mounting heights positions available.

Ideal for 'low mount' Jack Rails Heights

- RAJ-8K-L – 'Low Mount'** model incorporates adjustable height Roller Body Brackets suitable for Four Post Lifts using low profile Jacks with medium to high mount jack rails, to provide enough clearances for proper operation when lift is fully lowered. Two adjustable mounting heights positions available.

Ideal for 'medium to high mount' Jack Rails Heights
